

# Here's a little peace of mind just for you.

## When it comes to emergency preparedness, planning is everything.

In an emergency, having the right plan in place can mean the difference between simply being reactive and being proactive.

Star Rentals has a comprehensive Emergency Preparedness Plan to help government agencies work through crisis situations—whether from severe storms, floods, fire, earthquakes—or any number of natural or man-made disasters. Our plan enables Star to deliver the equipment needed to manage whatever comes your way. And that's important when thousands of people depend on you.

## Star Rentals has the right equipment and experience to back you up.

Our fleet has the lowest age in the industry, which means you get reliable equipment that is compliant with the latest government safety and environmental standards. When you work with Star Rentals, you've just added experienced professionals to your team to get you through the emergency. Locally-owned Star Rentals has 18 locations in Washington and Oregon—and is truly a part of your community.

Other rental companies may say they are ready for an emergency, but Star Rentals is the one with the plan. Talk to a Star Rentals representative today.
